Spirit[®] Select

The Intelligent Hospital Bed

CHG's Spirit Select[®] is the intelligent choice when it comes to hospital beds. Designed to keep both patients and staff safe in every aspect, this bed truly exceeds hospital expectations and safety standards.

Fall Prevention & Safe Transfers

Many patients become restless and disoriented during sleep due to certain medical conditions. When this occurs, patients can fall out of bed, causing serious injury.

- Spirit Select[®] is the only truly low acute care bed on the market, with a low height of 10" from floor to mattress deck.
- Low height allows patients to adjust the bed to accommodate their own needs and enter and exit with stability.
- Programmable nightlight adds an additional element of safety during patient transfers.

Infection Control

Nosocomial infections affect approximately 2 million patients annually, resulting in nearly 90,000 deaths in acute care facilities every year. This issue also has a major impact on cost effectiveness within hospitals – the price to treat patients for their hospital-acquired infections (HAIs) has been estimated at \$5 billion each year in the United States.

- Spirit Select[®] fights the spread of infection with its antibacterial rails and head/footboard, open architecture and easy-to-clean design.

Smart Bed Technology

Not all patients have the same needs due to factors such as physical injury, surgery, medication, chronic pain, head trauma and age.

- Spirit Select's Smart Bed Technology helps provide a more secure environment, and gives hospital staff the information they need to provide the best care for their patients regardless of the circumstances.
- Equipped with Nurse Call Connectivity, EMR Capabilities, SD Card Update, 32-Character LED Display, Auto-Functions and Watchdog[™] Bed Status System, the Select bed improves staff efficiency and patient outcomes.

CHG[®]
HOSPITAL BEDS

Standard Safety Features

- Patient Lock-Outs
- Central Lock-and-Steer System
- Auto Contour
- Low Chair Positioning
- Trendelenburg/Reverse Trendelenburg
