HOSPITAL BEDS

The latest **all-in-one innovation** from
CHG's **trusted** line of hospital beds.

Spirit ONE™

Spirit ONE™

All-in-one innovation

CHG's Spirit ONE™ bed is the latest all-in-one innovation when it comes to hospital beds. Spirit ONE combines the features of a Med-Surg bed, a Bariatric Bed, and a Low Bed while maintaining CHG's commitment to exceeding safety standards. Designed for supreme flexibility, yet simple enough to use in any setting, Spirit ONE offers hospitals the best of three worlds in one smart, functional package.

Innovative concept

A growing concern in hospitals is the number of specialty products rented or purchased for unique patients. These products are often expensive, difficult for staff training, and don't provide the necessary features of standard Med-Surg hospital beds.

Could one bed accommodate all patients regardless of their status?

Innovative Design

CHG Engineers worked directly with caregivers to develop a product that would address a wide variety of specific patient needs while preserving the safety of hospital staff.

Spirit ONE is equipped with an integrated Bed Exit Alarm with Alarm Fatigue Prevention, Tuckable Quad Rails, Integrated Smart Scale, 1000 lb. Weight Capacity, Expandable Bed Frame, an Ultra-low Height of 10.75", and much more.

Innovative Solution

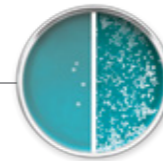

Is there a bed that can do it all? There is now. CHG's Spirit ONE bed helps hospitals streamline their expenses, minimize training, and reduce unnecessary inventory with one product that meets all of their hospital bed needs.

Fall Prevention

Travel Range of 10.75" to 30" for proper patient positioning and safety

Integrated Bed Exit Alarm with Alarm Fatigue Prevention features including Auto Arm and Auto Reset

10.75" to 30"

Minimize Infections

Antibacterial Siderails and Head/Footboard reduce hospital bacteria such as MRSA and E. coli by up to 99.9%

Open Architecture with removable mattress deck panels for thorough and efficient cleaning

Smart Technology

Integrated Smart Scale weighs up to 1000 lbs. in any bed position, with the touch of a button

Watchdog™ Indicator System helps to remind staff of routine procedures and properly identify patient needs

CHG's Flex Screen creates a unique user interface that combines a 4.3" LCD Color Display with programmable 'hot keys', giving staff the flexibility of a touch screen with the reliability of a true keypad

Instant CPR Rail-Drop Function automatically positions the bed (including rails) for hospital staff so they can access and treat the patient immediately in an emergency

Patient Accommodation

1000 lb. Weight Capacity increases flexibility of use and reduces rentals of specialty beds

Expandable Rails & Head/Footboard can be set to adjust and accommodate mattress widths of 36, 42 or 48" – depending on the needs of the patient

Rail Design is compliant with all 7 Bedrail Entrapment Zones, while the short head rail provides patient support during transfers

Programmable Nightlight promotes safety while getting in and out of bed and also provides comfort in an unfamiliar setting

Safe Transfers and Mobility

Tuckable Rails to eliminate transfer gap and simplify transfers

Multi-Zone Obstruction Sensors help to prevent injury or damage of equipment in patient room

6" Easy-Glide Dual-Wheel Casters for easy transfers throughout the hospital

Central Lock-and-Steer brake function increases caregiver control

Integrated Mattress Pump Holder
110V Accessory Outlet

Spirit ONE's Expandable Bed Design for patient accommodation

Spirit ONE's rails and mattress deck fully expand with the pull of three handles to accommodate weights up to 1000 lbs. The headboard expands to maintain compliance with all entrapment zones.

Specifications*

- Travel range from 10.75" to 30"
- Expandable Bed Frame – 36" – 42" – 48"
- 84" Mattress Deck Length
- 1000 lb. Weight Capacity
- Central Lock-and-Steer System
- 6" Easy-Glide Dual-Wheel Casters
- Tuckable Quad-Rails with Embedded Patient Controls
- Battery Back-up System
- Integrated Scale System
- 4.3" LCD Graphics Display
- Manual CPR Release
- Integrated Bed Exit Alarm
- Fully-Electric DC Motor Design
- Nurse Call Button
- Complete "System Lockout" Feature
- Footboard Control Pad with Individual Function Lock-outs
- Backlit Patient & Footboard Staff Controls
- Trendelenburg/Reverse Trendelenburg Functions
- Auto-contour Function
- Advanced Power Supply Status Indicator
- Integrated Mattress Pump Holder

*All dimensions are nominal. Specifications may be subject to change.

Optional Items

- Underbed Multi-Zone Obstruction Sensor
- 110v Accessory Outlet
- Extension Kit
- Watchdog™ Indicator System
- Mattress Surfaces available separately
- CPR Rail Drop
